

Looking to keep your employees and customers safe from airborne contaminants and help maintain social distancing? If your business is in need of a preventative product offering an additional layer of protection, look to our Protective Shields. Our shields come in a variety of sizes and can be customized to your space.

Keyser's Protective Shields are available in both Acrylic or Tempered Glass. To work with our team on a solution for your business, contact info@explorekeyser.com!

Choosing Between Acrylic vs. Glass

Keyser's Acrylic Shield Overview

- **Lightweight**
 - Weighs 50% less than glass.
 - Easier material to handle in temporary settings.
- **High Transparency**
 - Does not yellow with age, maintains high clarity throughout its lifetime.
 - UV light resistant.
 - Perfect use for indoor sneeze guard protection for food and the staff/customers in the surrounding specific areas throughout your space.
- **Impact Resistant**
 - Tensile strength greater than 10,000 lbs.
 - Under high impact, it won't shatter but fracture into large, dull pieces.

Keyser's Tempered Glass Shield Overview

- **Safety**
 - 4 times stronger than standard glass and can withstand forceful impacts, blows, and scratches while adding an extra sparkle in your space.
 - Main advantage with tempered glass is if it does break, the glass disperses into blunt, pebble-like pieces, rather than the sharp shards of traditional glass that will keep your customers and staff protected.
- **Versatility**
 - The strength of tempered glass allows it's use in many creative and unique applications while shielding you from splashes or sprays.
 - Add an innovative and stylish effect to your restaurant and retail spaces.
- **Quality**
 - Tempered glass is high quality, offering crystal-clear clarity and exceptional results in a variety of settings.
 - Ideal for everyday use that will stand up to daily wear and tear withstanding years of constant use.
